***Allowable Subject Matter***

Claims 1-2, 4-19 allowed.

The following is an examiner's statement of reasons for allowance:

The prior art of record fails to teach or suggest the combination of all limitations in independent claim 1, see following limitations:

A multiplying device for multiplying the first frequency data stored in first histogram memory device for a coefficient a selection device for comparing the first frequency data output from multiplying device with the second frequency data stored in second histogram memory device and for outputting frequency data having a smaller value; and a compensating device for compensating the luminance level of input luminance signal based; on the outputted frequency data.

The prior art of record fails to teach or suggest the combination of all limitations in independent claim 4, see following limitations:

A minimum value selector for comparing the multiplied frequency distributed data and frequency distribution data output by the second histogram memory and for outputting smaller of the multiplied frequency distribution data and the frequency distribution data output by the second histogram memory; an accumulator circuit for accumulating frequency distribution data output by the minimum value selector in an accumulation histogram memory; and a compensation circuit for compensating luminance level of the digital signal based on the accumulated frequency distribution data.

The prior art of record fails to teach or suggest the combination of all limitations in independent claim 10, see following limitations:

Comparing the multiplied frequency distributed data and frequency distribution data output by the second histogram memory area; outputting smaller of the multiplied frequency distributed data and frequency distribution data output by the second histogram memory area; accumulating frequency distribution data in an accumulation histogram memory', and compensating luminance level of the digital video signal based on the accumulated frequency distribution data.

The prior art of record fails to teach or suggest the combination of all limitations in independent claim 15, see following limitations:

Means for multiplying frequency distribution data output by the first means for storing frequency distribution data by a frequency data coefficient; means for comparing the multiplied frequency distributed data and frequency distribution data output by the second means for storing frequency distribution data; means for outputting smaller of the multiplied frequency distributed data and frequency distribution data output by the second means for storing frequency distribution data; means for compensating luminance level of the digital video signal based on the accumulated frequency distribution data.

The new numbering of the claims:

Old number	New number	Type of claim
1	1	Independent
2	2	Dependent
4	3	Independent
5	4	Dependent
6	5	Dependent

7	6	Dependent
8	7	Dependent
9	8	Dependent
10	9	Independent
11	10	Dependent
12	11	Dependent
13	12	Dependent
14	13	Dependent
15	14	Independent
16	15	Dependent
17	16	Dependent
18	17	Dependent
19	18	Dependent

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
